ESR RTF Subcommittee

Grants & Fellowships

The Grants and Fellowships survey was performed from October 2005 to February 2006, and repeated until November 2006. A questionnaire was sent by e-mail to the European Association of Radiology RTF national representatives and replies were received from a total of 19 countries. The information collected was about radiological websites and national journals of radiology or medicine, as well as any other information which the RTF representatives thought useful. Unfortunately, many countries do not have grants or fellowships open to foreign graduates, but nevertheless, the information below may be useful.
